

DADsync

Dharmanagar Ai Datasync Pvt. Ltd.

Project Proposal

The Dharmanagar AI & Data Hub - a Tier-III equivalent AI compute and data centre for Northeast India

Powering Northeast India's AI Future

Dharmanagar, North Tripura, Tripura - 799250

1. Executive Summary

DADsync (Dharmanagar Ai Datasync Pvt. Ltd.) is developing the Dharmanagar AI & Data Hub, the first hyperscale-ready AI and data infrastructure in Northeast India. Strategically located in Dharmanagar, North Tripura, the hub is engineered to host dense AI compute nodes, GPU clusters and massive data lakes with Tier-III equivalent reliability, 100% data sovereignty and ultra-low regional latency.

2. The Opportunity

Northeast India has no enterprise-grade AI compute or data centre capacity today. Regional enterprises, governments, universities and startups are forced to route data to central India or abroad, paying latency and bandwidth penalties while losing data sovereignty. DADsync captures this untapped demand as the first mover in the region - and extends it to neighbouring cross-border markets.

3. Project Highlights

Phase 1 Investment	Rs 55-80 Cr
Initial Storage Capacity	1 PB+ Enterprise
Compute Platform	NVIDIA H100 GPU Clusters
Facility Standard	Tier-III Equivalent
Target IRR	24-28%
Operational Breakeven	18-24 months

4. Phased Roadmap

- Phase 1 (Current): Core infrastructure setup - primary data centre in Dharmanagar, 1 PB storage, foundational networking.
- Phase 2: AI compute expansion - dedicated NVIDIA H100 GPU clusters and managed AI platform services.
- Phase 3: Regional edge network - edge compute nodes across Northeast states for ultra-low latency.
- Phase 4: Global integration - direct fibre peering with major global cloud providers and international gateways.

5. Economic Impact

Direct Jobs Created	150+
Indirect Opportunities	500+
Projected Regional GDP Contribution	Rs 200 Cr (5 years)

6. Why Invest

- First-mover advantage - the first hyperscale-ready hub in the region.
- High-margin AI compute - infrastructure positioned for the most lucrative AI workloads.
- Strategic location - edge advantage across Northeast India and cross-border markets.
- Government support - aligned with Digital India and favourable regional IT policies.
